## (四) 檢索指令

利用 Advanced Search 模式中的 Keyword 檢索時，可以善用下列檢索指令增加資料查詢的完整性。

### 1. Truncation and Wild Cards 串字及切截字（萬用字元的運用）

- ✓ 無限制切截字：「\$」

The screenshot shows the Ovid search interface. At the top, there are navigation tabs: Basic Search, Search Fields, Advanced Search, and Multi-Field Search. Below these, there's a section for 'Selected Resources' with 'Ovid Resources: Books@Ovid June 17, 2010'. The search method is set to 'Keyword'. The search input field contains 'interest\$'. There are radio buttons for 'Author', 'Title', 'Book Name', and 'Natural Language Search'. A 'Search' button is to the right. Below the search field, there's a 'Limits' section with a dropdown menu set to '-All Books-'.

除了 interest 之外，還可以檢索到 interests、interested、interesting 等。

- ✓ 有限制切截字：

使用者也可以在「\$」之後輸入可接受查詢最大數量的數字。例如查詢「dog\$1」，

The screenshot shows the Ovid search interface. At the top, there are navigation tabs: Basic Search, Search Fields, Advanced Search, and Multi-Field Search. Below these, there's a section for 'Selected Resources' with 'Ovid Resources: Books@Ovid June 17, 2010'. The search method is set to 'Keyword'. The search input field contains 'dog\$1'. There are radio buttons for 'Author', 'Title', 'Book Name', and 'Natural Language Search'. A 'Search' button is to the right. Below the search field, there's a 'Limits' section with a dropdown menu set to '-All Books-'.

如此，就可以找到 dog、dogs，而不會找到 dogma。

### 2. Query and Operators 布林邏輯及運算元

- ✓ OR

聯集兩個或更多檢索款目（項次）成為一個檢索項次，而此項次包含其中的任何一個檢索款目（項次）。例如 *heart attack OR myocardial infarction*，

The screenshot shows the Ovid search interface. At the top, there are navigation tabs: Basic Search, Search Fields, Advanced Search, and Multi-Field Search. Below these, there's a section for 'Selected Resources' with 'Ovid Resources: Books@Ovid June 17, 2010'. The search method is set to 'Keyword'. The search input field contains 'heart attack OR myocardial infarction'. There are radio buttons for 'Author', 'Title', 'Book Name', and 'Natural Language Search'. A 'Search' button is to the right. Below the search field, there's a 'Limits' section with a dropdown menu set to '-All Books-'.

這樣就會找到有 heart attack OR myocardial infarction 的資料。

## ✓ AND

交集兩個或更多的檢索款目（項次）成為一個檢索項次，在此檢索項次所找到的任何檢索結果都必須同時包含所有交集的款目（項次）內容。例如 *hypertension And Stroke*，

The screenshot shows the 'Basic Search' tab selected. Under 'Selected Resources', 'Ovid Resources: Books@Ovid June 17, 2010' is displayed. The search type is set to 'Keyword'. The search input field contains 'hypertension And Stroke'. A 'Search' button is visible to the right of the input field. Below the input field, there is a 'Limits' section with a dropdown menu currently set to '-All Books-'.

表示檢索之結果需同時包含 *hypertension* 和 *stroke* 這兩個檢索款目。

## ✓ NOT

兩個款目（項次）的差集在成為另一個檢索項次，此時新的檢索項次查詢所得的結果為在包含前項檢索款目（項次），但不包含後者檢索款目（項次）。例如 *heart disease NOT obesity*，

The screenshot shows the 'Basic Search' tab selected. Under 'Selected Resources', 'Ovid Resources: Books@Ovid June 17, 2010' is displayed. The search type is set to 'Keyword'. The search input field contains 'Heart disease NOT obesity'. A 'Search' button is visible to the right of the input field. Below the input field, there is a 'Limits' section with a dropdown menu currently set to '-All Books-'.

表示找到的文獻中需包含 *heart disease* 但沒有 *obesity*。

## ✓ ADJ

放在指令列上的兩個或更多款目之間的指令，中間除了 stopwords 之外，其他字都不需要放入，而且款目間的前後次序不可對調。例如 *role ADJ play*，

The screenshot shows the 'Basic Search' tab selected. Under 'Selected Resources', 'Ovid Resources: Books@Ovid June 17, 2010' is displayed. The search type is set to 'Keyword'. The search input field contains 'Role ADJ play'. A 'Search' button is visible to the right of the input field. Below the input field, there is a 'Limits' section with a dropdown menu currently set to '-All Books-'.

就會找到有「*role play*」這個詞彙的文獻。

## ✓ **FREQ**

通常在全文檢索時可以提供很大的幫助。Freq 是查詢檢索款目出現的頻率，其指令語法為 X.fd/freq=n；其中 X 是檢索款目，fd 表示檢索的欄位，n 是指出現的頻率。例如 hepatitis.tx/freq=5

Basic Search | Search Fields | Advanced Search | Multi-Field Search

Selected Resources

Ovid Resources: Books@Ovid June 17, 2010

Keyword  Author  Title  Book Name  Natural Language Search

hepatitis.tx/freq=5

Limits (Click to expand) Limit to book: -All Books-

表示查詢在全文欄位 (tx) 中，hepatitis 至少出現 5 次以上的所有文獻。(只適用於單一欄位查詢)。

The screenshot shows the Ovid Full Text page for the book 'Reese & Betts: A Practical Approach to Infectious Diseases'. The page is titled 'INFECTIONS OF PERMANENT CARDIAC PACEMAKERS AND IMPLANTABLE CARDIOVERTER DEFIBRILLATORS' and is part of '12. CARDIAC INFECTIONS'. The main content area displays the following text:

**1. Permanent cardiac pacemaker infections [124,125]**

Pacemaker systems consist of a generator, which sits in a surgically created pocket below the subcutaneous or subfascial tissue in the chest or abdominal wall, and electrode leads, which may be epicardial or, more commonly, transvenous (in which case the electrodes are attached to the endocardium). The generator pocket and the intravascular and intracardiac portions of the leads eventually become encased in dense layers of endothelialized fibrous tissue.

**A. Location**

- Generator units or the lead wires in their subcutaneous position.** These infections are commonly seen soon after pacemaker placement or generator exchange. Later infections may be seen as a result of necrosis of the skin overlying the generator or trauma to the generator. There may be signs of swelling, erythema, and pain over the generator. Drainage is more commonly seen in infections soon after implantation. Systemic signs and bacteremia may be present.
- Epicardial electrodes** may become infected from spread from the generator pocket or direct contamination at placement. In addition to clinical findings noted above, pericarditis and mediastinitis may occur.
- Intravascular portion of the transvenous electrode (pacemaker endocarditis)** [126,127]. This usually arises because of intravascular tracking of infection of the subcutaneous portion of the pacing device. An incidence of 0.5% has been noted. Bacteremic seeding from a remote site of infection can lead to this process. Unless infection occurs after recent pacemaker isolation or manipulation with obvious acute pocket infection and systemic toxicity, the diagnosis can be elusive.TEE is especially useful in demonstrating vegetations on the electrodes, tricuspid valve, or ventricular endocardium. Symptoms can range from fever and chills to overt septic shock.

**B. Predisposing factors [128]**

- Skin necrosis** overlying the generator can predispose to infection. This is less common with subfascial than subcutaneous placement of the generator. Skin erosion can occur for multiple reasons, including body build, shift in generator placement, or poor nutrition.
- Self-induced trauma**, such as from heavy lifting, repetitive movements involving the chest wall, or a direct blow to the generator pocket area, can occur.
- Bacteremia** from a source other than an infected generator can cause infection of the system in case circumstances. **The generator is at greatest risk for infection.**

## GENITOURINARY TRACT INFECTIONS

**Thomas T. Ward**  
**Stephen R. Jones**

Urinary tract infections (UTIs) are the most prevalent infection of adults for which antimicrobials are used. UTIs are most often an infection of otherwise healthy people and usually are treated on an outpatient basis. In the United States, symptoms of dysuria, urgency, or frequency result in three to four clinic visits per 100 women, and 80% or more of such episodes lead to the use of laboratory tests or to the prescription of drug therapy, or both. In addition to the inconvenience and cost posed by UTIs, infections occasionally result in protracted illness and serious disease, including gram-negative sepsis and death.
